

Official price list for CyberInstaller Suite 2022

CyberInstaller Suite registered licenses (**Personal**, **Professional** and **Enterprise**) offer many advantages compared to the Free, as full access to all the features implemented in Studio (except for the most advanced features, not available in Personal license), without any limit in number of components you can add or in total package size.

Features and limitations vary by license (see last page of this document for the comparison table between the versions).

▶ **FREE**

for hobbyist use and freeware packages

- ✦ free of charge to download and use without time limits

▶ 3x2 promo: buy 2 get 3!

every 2 Professional or Enterprise licenses you buy, 1 is a gift!

- ✦ eg.: purchasing 2 licenses, you will get 3
- ✦ eg.: purchasing 4 licenses, you will get 6
- ✦ eg.: purchasing 6 licenses, you will get 9

Notes about multi-licensing, from End-User License Agreement (EULA)

Every installed license, once it has been registered (Personal/Professional/Enterprise), is usable by just one user and on one computer only. Thus, if you have the need to let more users use a registered license of CyberInstaller Suite, it is necessary to purchase a registered license for every user that will use it and for every computer where it will be installed. It is not possible to use the same registered license by more than one user or on different machines.

Professional and Enterprise licenses are the only ones that allow you to distribute commercial software. Any organization, company, society or professional developer, must purchase at least a Professional license.

How to update your license

Once you have purchased a registered license (Personal, Professional or Enterprise), the corresponding activation code (linked to the license owner name) will be sent from SilverCyberTech to your email inbox. Such code must be inserted directly in the Studio module, in "Tools/Options/License" window, "Unlock code" field.

Payment methods

▶ PAY PAL (credit card or PayPal account)

Enter the on-line shop to accomplish the purchase with a credit/pre-paid card now:

<https://www.silvercybertech.com/english/eshop.html>

Here you can immediately purchase the registered licenses of **CyberInstaller Suite** (Personal, Professional or Enterprise, even in "update" edition) through credit card, pre-paid card or on-line account, in absolute safety thanks to PayPal services.

▶ BANK TRANSFER

To the following international bank account:

bank: Banco Posta
receiver: Pappalardo Sergio
IBAN: IT31 I076 0111 8000 0006 6902 685

As the transfer is accomplished, it is highly recommended to send payment acknowledgment to the customer service: info@silvercybertech.com

Important notes

As soon as payment is done it is highly recommended, but not mandatory, to send an email to the customer service (info@silvercybertech.com) specifying the registered license holder's name (case-sensitive). Created installation packages will be always signed in with such name.

Immediate shipping of the activation code will follow (within 24 business hours).

Contact the customer service for any doubt or explanation and to receive the needed assistance to conclude the purchase in the best way. We are at your total disposal and we will answer you as soon as possible (usually within 24 hours or less).
